DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 42-60 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-41 of U.S. Patent No. 6,703,272. Although the conflicting claims are not identical, they are not patentably distinct from each other because as follows: both U.S. Patent and instant application claimed a method of forming spaced conductive regions and capacitor constructions. Moreover, the claims 1, 9, 21 and 34 in the U.S. No. 6,703,272 are either narrower version of the claims of the instant application or obvious variations thereof. For example, in claim 9 of U.S. No. 6,703,272 "... subjecting the second electrically conductive material to anodic dissolution; the first electrically conductive...during the anodic dissolution..." (claim 9)" whereas claim 48 of the instant application claims "electrically removing some of the

Art Unit: 2814

second electrically conductive material; the first electrically conductive... during the removal of some of the second electrically conductive material... (claim 48)", that shows the limitation claimed (claims 1, 9, 21 and 34) of reference U.S. No. 6,703,272 is more narrower than the claims of the instant application. The facts are that the claims of the U. S. Patent No. 6,703,272 and instant application have claimed the same goal and are not distinguished from each other.
